Biography

I currently work as a research assistant at Institute of Marine Sciences and Technology, Dokuz Eylül University. I graduated from the Department of Chemistry, Faculty of Arts and Science, Dokuz Eylül University in 2010. I received my M.Sc. degree in 2012 from the Chemistry Programme at Graduate School of Natural and Applied Sciences, Dokuz Eylül University. My M.Sc. thesis was related to investigation, field testing and ecotoxicological testing of antifouling and eco-friendly biocides. I received my Ph.D. from the Marine Chemistry Programme at Graduate School of Natural and Applied Sciences, Dokuz Eylül University. In my doctoral studies, I focused on marine biogeochemistry subjects: seasonal cyclings of nutrients, carbohydrates and amino acids at eutrophic and oligotrophic parts of semi-enclosed bay (Izmir Bay). Currently I'm working on molecular characterization of organic matter in the marine environment. I also work on liquid chromatography, microfluidics and analysis of organic molecules with spectroscopic instruments (UV-Vis Absorbance, Fluorescence) for method development in marine chemistry. In my works, I use R, Python and Matlab programming languages and software for statistical analyses, graphing, modeling and data transfer from analysis instruments.
